

GREAT CRAFT BREWERS COMBINE INNOVATION WITH TRADITION. SO DO GREAT FLOORING COMPANIES.

WE MANUFACTURE & INSTALL SEAMLESS, SANITARY & SAFE FLOORS FOR CRAFT BREWERIES.

Stonhard brings you tradition – over 90 years of manufacturing and installing seamless floors, along with innovation; installing floors with outstanding chemical & stain resistance, textured surfaces to prevent slips and falls, and seamless, clean formulations that stand up to harsh thermal cycling. All this and our floors are easy to maintain.

QUALITY & SAFETY - As craft brewers you are committed to quality and safety, vision and innovation. Stonhard floors meet both performance and design specifications for brewing plants, while incorporating sustainable design in our formulations. Ask us about our floors with recycled glass content!

CLEAN & SANITARY - Stonhard floors are seamless; no cracks or joints where bacteria can develop. Maintenance is simple too – no need to repair ‘loose’ tiles. Stonhard floors can also be easily sloped and pitched to drains, away from equipment.

STONHARD

PRODUCT MANAGEMENT & RESPONSIBILITY - Stonhard's installation teams work with existing concrete or new construction, and adhere to safety regulations. We provide expert product management - flexible scheduling and full responsibility for the installation. We cover both products & workmanship.
